

AKKA

PASSION FOR
TECHNOLOGIES

YOUR PARTNER FOR CAX TRAINING AND SUPPORT

FROM THE INTRODUCTION TO SUCCESSFUL
IMPLEMENTATION AND SUPPORT

OUR TRAINING COMPETENCES

Highly qualified AKKA coaches train your developers in the most common CAD systems and thereby combine effective didactic methods with the practical experience from their own design engineering work. The training programs naturally have a modular structure.

THE MODULAR TRAINING CONCEPT – THE STAIRWAY TO SUCCESS

We tailor our training programs to your needs. The training measures are therefore practice-relevant, efficient and inexpensive. You pay for what you need. We can naturally also offer you an extensive, practice-oriented standard course program drawing on the many years of experience of our coaches. If necessary we also provide the necessary facilities and infrastructure.

OUR COURSE OFFERING – YOUR CHOICE

- Training concepts
- Course creation
- Training organization
- Training operation
- CAD/PDM seminars
- Process seminars
- Special training seminars
- Management staff seminars

OUR BENEFITS

We offer you expertise based on:

- 20 years of operation on the market
- Approximately 1500 trainer days per year
- Training experience of approx. 5000 course participants per year in our own training center
- Cooperations with leading customers for a wide variety of industries

Furthermore AKKA is an authorized and certified training partner for Siemens NX for Daimler AG and its suppliers.

WE ARE THERE FOR YOU – OUR SUPPORT OFFERING ENSURES YOUR WORK CAPABILITY

Your developers concentrated on the innovative product development – we support your employees in the use of the applications, allowing for your company-specific methods.

- First-level support:
 - Application hotline for minor functional problems
- Second-level support:
 - On-site service for more complex methodological challenges

As part of the support, our support team identifies fields of action and explains these. With the knowledge thus gain, you continuously achieve improvements to further the competences of your employees and the use of your methods and tools. In close cooperation with our Training department, we offer you targeted training measures, where necessary – naturally also as “training on the job”.

OVERVIEW OF SERVICES

- Hotline and on-site support for:
 - CAD
 - EDM/PDM
 - Requirements engineering
- Support in the project planning
- Sustainable implementation with training at the place of work
- Stabilization of methods
- Continuous documentation
- Software release test and back-up
